Tactical Advanced Computer (TAC) Blanket Purchasing Agreement (BPA)

Ordering Guide

23 May 1996

Updated: 1 April 1997

NAVAL COMMAND, CONTROL AND OCEAN SURVEILLANCE RDTE DIVISION 49184 TRANSMITTER ROAD, ROOM 1 SAN DIEGO, CA 92152-7346

The TAC Blanket Purchasing Agreement has been competed and meets the Competition in Contracting Act (CICA) requirements for competitive award.

Tactical Advanced Computer Blanket Purchasing Agreement (TAC BPA) Ordering Guide

This ordering guide provides the necessary information for purchasing Commercial-off-the-Shelf (COTS) equipment through the TAC BPAs. The TAC Project Office has made agreements with resellers/vendors on GSA Contract to provide COTS equipment for all DoD Agencies at a lower price than the GSA Schedule. By using these directions and guidelines, your <u>TAC Notebook</u>, <u>PC</u>, <u>Notebook</u> Workstation, or Joint Workstation order(s) will be processed with the fewest delays and/or corrections.

- **STEP 1.** Fill out the TAC Purchasing Worksheet (**Example 1**) to include:
 - (1) The GSA Reseller's/Vendor POC and mailing address.
 - (2) The Purchasing Agreement # and GSA Contract # for the associated Reseller/Vendor.
 - (3) The product(s) Item Number, Model Description, Part Number, Quantity, Ordering Price, and Total Costs.

Attachment 1, Page 9 - 17 (Notebooks, PCs, Notebook Workstations, and Joint Workstations) provides the above information and phone numbers for the associated GSA Reseller/Vendor. For more information, call the Vendor POC, view the TAC Website (http://tac.nosc.mil), or ask for assistance via email (tac@nosc.mil).

(4) Fax or email the completed TAC Purchasing Worksheet (**Example 1**) to the TACPO for technical review (because products and prices are evolutionary). (Email: tac@nosc.mil, fax: (619) 553-6605, or call (619) 553-7786 or 5217 for assistance.)

Note: It is recommended that this worksheet be generated on the TAC Website from the purchasing list provided for each vendor.

After the TAC Worksheet has been reviewed by the TAC Project Office, use one of these ordering procedures as appropriate:

- Using NAVCOMPT Form 2276 STEP 2
- Using DD1155 or SF 1449 **STEP 3**
- Procedures for NCCOSC San Diego STEP 4

For all orders, delivery status can be monitored by calling the vendor.

- STEP 2. Send the completed Worksheet and the forms required by your command to purchase computer equipment to your Command's Budget Office. Include the GSA Contract # and Purchasing Agreement # on all paperwork to receive the ordering price. A NAVCOMPT Form 2276 (Example 2) issuing funds to NISMC, will be completed by your Command's Budget Office (funds can also be issued on a MIPR), and
 - (1) Fax the completed package to (202) 433-6442 and send the originals via express mail to:

Department of the Navy (Code 02)

Naval Information Systems Management Center (NISMC)

Washington, DC 20374-5070

Attn: TAC BPA, Contracting Officer (202) 433-7128

- (2) Upon receipt, NISMC will assign a delivery order number and send the completed package to the reseller for ordering.
- (3) Use the delivery order number to request status of delivery by calling the reseller.

- STEP 3. Send the completed Worksheet and an Order for Supplies/Services Form DD 1155 or a Solicitation/Contract/Order for Commercial Items, Standard Form 1449 to your contracting officer to purchase equipment from the BPA holders GSA Scheduled Contract. The following information and example forms are provided:
 - (1) Form DD 1155 must include the Purchasing Agreement # in Block 19 and reference the reseller's GSA Contract # in Block 1. (**Example 3**)
 - (2) SF 1449 must include the Purchasing Agreement # in Block 20 and reference the reseller's GSA Contract # in Block 2. (Example 4)
 - (3) Upon receipt, the reseller will issue an invoice number associated with your purchase order number and process the order.
 - (4) Use the invoice number or your purchase order number to request status of delivery by calling the reseller.
- STEP 4. Send the completed Worksheet and Route Sheet (<u>Example 5</u>) with the necessary approvals, and the NAVCOMPT Form 2276 issuing funds to <u>NISMC</u> (<u>Example 6</u>), to NCCOSC's Budget Office (Bldg. 33 Rm. 2606B) or contact Kris Iselin, (619) 553-5217, at the TAC Project Office for assistance. The NCCOSC Budget Office will return the completed package to the TAC Project Office for submission to NISMC.
 - (1) Upon receipt, NISMC will assign a delivery order number and send the completed package to the reseller for ordering.
 - (2) The TAC Project Office will receive a copy of the completed package with the assigned delivery order number and distribute a copy to the NCCOSC ordering code(s).
 - (3) Use the delivery order number to request status of delivery by calling the reseller.

The attached examples are included for your references and any forms should be provided by *your* Command. Questions or requests for information may be obtained by sending email to: tac@nosc.mil. Information regarding the TAC BPAs are located at the TAC Project Office (http://tac.nosc.mil/) World Wide Web Sites.

For your information, credit card orders can be placed with the Vendor on the BPAs.

TAC JOINT WORKSTATION (TAC JW) *** Awarded 12/18/96 ***

The Tactical Advanced Computer Joint Workstation (TAC-JW) is a General Services Administration (GSA) Multiple Award Schedule Blanket Purchasing Agreement (BPA). This acquisition was conducted for the US Navy, US Marine Corps, and US Coast Guard. Other DoD agencies eligible to use the GSA Federal Supply Schedules may be permitted to purchase products and services through this BPA. This BPA will be continuously reviewed for refreshment of prices and technology and replaces the TAC-5 ID/IQ Contract.

Functionally, the Government has acquired RISC¹ Workstations² and Servers³ which run Unix⁴ and Windows NT⁵ Operating Systems. NISMC issued BPAs to:

All the above TAC JW BPAs provide extensive hardware, software and services. All Hardware and Software under TAC Joint Workstation is both DII COE and Year 2000 compliant. Vendors will deliver all products within 60 days of receipt of order and will coordinate with the TAC Project to customize logistics support for Naval customers and their unique operating environments.

Non-GSA Schedule option items have been allowed in the BPA. The TAC Project will ensure that non-GSA Schedule option items ordered shall be incidental and their costs small compared to the total cost of each order.

FEATURED PRODUCTS

<u>Digital Equipment Corporation (DEC)</u>, N68939-97-A-0004 features the latest AlphaStation 255, 500, 600 models and the AlphaServer 4100 and 8400 models, as well as the Alpha VME 4/288 Single Board Computer. Highlights include the AlphaStation 500/500, running at 500 MHz and rated as the fastest workstation in the world. DEC proposed products and services from its own GSA schedules only; GS-35F-3094D and GS-35F-0137D. Third party product integration has been made available when purchased from their services schedule.

Digital's workstations come in three levels and are available in pre-configured packages or may be "user configured" using building blocks and required peripherals. The first two workstations being offered are desktop systems: the AlphaStation 255/300 is an entry level to mid-range desktop workstation and AlphaStation 500/500 is a high-end desktop workstation. The AlphaStation 600/333 provides high-end workstation performance in a deskside enclosure. Each workstation can be purchased in a predefined configuration with full integration and the standard warranty, or with full integration, test, burn-in, and an extended warranty. For users with specific needs, each workstation can be configured as needed by selecting the basic workstation building block and adding memory, graphics, storage, and other peripherals as required. For these customer designed systems, the full integration, test, burn-in, and extended warranty options are also available. In all cases the user may select their operating system of choice whether it be Microsoft Windows NT, UNIX, or OpenVMS.

Digital's server offerings include two of the most powerful servers in the market: the AlphaServer 4100 providing the processing power for small to large workgroups and the AlphaServer 8400, providing the power needed for large data center type applications or support for very large workgroups. Each system is offered in preconfigured packages or may be custom configured by the user to meet specific needs. The preconfigured system may be purchased with standard warranty and

user installation or with full on-site installation and extended warranty. The AlphaServer 4100 is available with Microsoft Windows NT, UNIX, or OpenVMS. The AlphaServer 8400 is available with UNIX or OpenVMS.

<u>Sun Microsystems Federal, Inc. (Sun), N68939-97-A-0005</u> Features the Ultra 1 and Ultra 2 Workstation Lines and the Ultra Enterprise Servers.

The Sun Ultra 1 comes in five models. Models 140, 140E, and 170 are aimed at more price-sensitive customers who do not require the more advanced features of the Model 170E. The Model 170E is for the customer who wants the new graphics, Fast/Wide SCSI, and 100-Mb Ethernet in one system. Model 200E is aimed at customers demanding greatest possible performance.

The Sun Ultra 2 is the highest-performing desktop system of the UltraSPARC product family. The Ultra 2 system incorporates the latest advances and technology in multiple processing, CPU, graphics, I/O, networking, and memory design. It also offers increased upgradability and expandability relative to the Ultra 1 system. The Ultra 2 system is available in single- or dual-processor models, and two CPU speeds, 167 MHz and 200 MHz, to meet a variety of price and performance points. Sun Ultra 2 Models offered on the BPA are: 1170 and 2170, 1200 and 2200.

The Ultra Enterprise Server family is a highly scaleable line of high-performance, high-capacity servers for compute-intensive applications. The Sun Ultra Enterprise Server Models 3000, 4000, 5000 and 6000 are provided on the BPA. The model 6000 offers up to 30 GB Memory, up to 162 GB internal disk storage and up to 10 TB external disk storage.

Sun also offers Netra Internet Servers, Mercury Signal Processors, rugged racks, SPARC-CPU 5V VME processors and ACE VME workstation systems, and many other integrated third party products, and a teaming arrangement with the following GSA Contractors:

- 1. SunService, Division of Sun Microsystems, Inc. GSA Schedule No. GS-35F-0119D
- 2. SMS Data Products Group, Inc. GSA Schedule No. GS-35F-3267D
- 3. Telos Corporation GSA Schedule Nos. GS-35F-4315D
- 4. Informix Federal GSA Schedule No. GS-35F-0132D
- 5. Applix Inc. GSA Schedule No. GS-35F-4025D
- 6. Wang Federal, Inc. GSA Schedule Nos. GS-35F-0195D and GS-35F-0087D
- 7. World Wide Technology GSA Schedule No. GS00K95AGS5905

Hewlett-Packard Company (HP), N68939-97-A-0006 offers its latest PA-7300 and PA-8000 based workstations and servers to meet the requirements of TAC JW users. Each workstation or server bundle is configured to provide a functional base system to which users may add offered disk, memory, interfaces and software components. Hardware and software add-ons are offered, which typically allow a system to be expanded to its maximum capacity. These components were selected to be fully compatible with the workstation or server they support. Hewlett-Packard also offers additional workstation and server bundles, which are specially configured to meet special requirements for compartmented mode workstations (CMW) security, high availability, graphics visualization, and web server and secure web server service.

HP's quotation included the following workstation systems: Model 712/100 with Secure (CMW) Operating System, Model J280, B132L, B160L, C160L, and C180-Xp Visualization Workstation. Their quotation included the following server systems: Model K260, T520, K210 Virtual Vault Server, and the Domain Enterprise/Internet Server Model K220. To meet the VME requirements, quoted the Model 744/132L VME Board Computer and the Model 748/132L VME Workstation system.

HP teamed with Sylvest and PRC in their quotation. The role of Sylvest is to provide a wide variety of third-party hardware and software components, which both complement the Hewlett-Packard offering and provide special capabilities that TAC JW users need. PRC, inc. is a leading supplier of technical support and integration services. Hewlett-Packard will directly provide all computing platforms, operating systems, selected technical services, and many software tools and middle-ware products. HP proposed products from their GSA Schedule GS-35F-0002D, Sylvest's GS-35F-0113D and GS-35F-3279D, and PRC's GS-35F-4340D.
